Experience

Better | Senior Software Engineer   **(2022 - Present)**
- Built real estate service in 4 months, growing its engineering team from 2 to 5
- Improved core workflow engine and a variety of API integrations with our many external partners
- Introduced GraphQL into our core product, and built automatic type converters to automatically generate and sync types from TypeScript
- Built React-based internal-facing UI for mortgage engine
- Wrote a variety of libraries compiled with Webpack and later Rollup

Hinge | Backend Engineer   **(2022)**
- Maintained and improved a Node based service layer powering a mobile app with 0.5M DAU
- Introduced Go into development workflow, and lead efforts to produce testable code
- Tackled scaling challenges while modernizing a legacy codebase and DB schema with over a 1B records

Jibe | Associate Engineer   **(2020 - 2022)**
- Built the service layer of a multi-tenant talent network management product
- Implemented search, SEO, logging, and role-based access control

Illumina Consulting Group | Web Developer   **(2019 - 2020)**
- Earned and supported subcontract with NITAAC, an NIH-based GWAC
  - Served as sole maintainer for a website handling several multi-billion-dollar contracts
  - Rebuilt web services to greatly improve usability and performance
- Developed a complex client-side library to navigate through large datasets using faceted browsing

Education

BS in Computer Science – Technical University of Munich, Munich, Germany   **(2018-2021)**
